Javier Jiménez Molina

Murcia, Spain · +34 625213560 · contact@javierjimenez.dev · linkedin.com/in/javierjimenezmolina · javierjimenez.dev

DevOps Engineer *with more than four years of technical experience, specializing in CI/CD, infrastructure and observability. A strong background in software development provides a broad view of the software lifecycle. Currently developing skills in AI agent integration and automation.*

SKILLS (STACK)

Jenkins (Shared Libraries) · GitLab CI · GitHub Actions · Git · Bitbucket | Kubernetes · Docker · Helm · Rancher | JFrog Artifactory Grafana · Graylog · Prometheus | Java · Spring Boot · Node.js · TypeScript · React | LLMs · MCP · Hermes Agent

PROFESIONAL EXPERIENCE

Krimda **Murcia, Spain**
DevOps Engineer *July 2025 – Present*

- **Advanced CI/CD:** Design and maintenance of modular Jenkins pipelines using Shared Libraries (Groovy), standardizing deployment workflows across multiple projects.
- **Artifact management:** Centralized management of binaries and dependencies with JFrog, integrated into CI/CD workflows.
- **Infrastructure Orchestration:** Administration and maintenance of Kubernetes clusters, supporting microservice availability and scalability. Development of scripts in Python, Node.js and Bash to audit and optimize cluster resources.
- **Observability and monitoring:** Deployment of Grafana dashboards and management of centralized logs with Graylog, improving incident response and real-time system visibility.

Capgemini **Valencia, Spain**
Hybrid role evolving from software development into operations engineering and automation *February 2021 – July 2025*

- **Development**: Development of microservices and REST APIs with Java and Spring Boot, and web applications with React and Node.js.
- **CI/CD:** Improved CI/CD practices and built pipelines with Jenkins and GitHub Actions, reducing deployment times by more than 80%.
- **Infrastructure:** Management of Docker containers and orchestration with Kubernetes and Helm. Monitoring of production environments using Rancher and Lens.
- **Cloud:** Deployment and management of OVHcloud resources for production environments.

FEATURED PROJECTS

- **MoneyFlow**: Personal finance application with web and mobile apps. Technologies: React, React Native, TypeScript, Supabase, PostgreSQL, Gemini API.
- **Personal Outline:** Outline-based platform with custom extensions, operated on Linux and container infrastructure. Technologies: web development, Linux, Docker, PostgreSQL, Redis, CI/CD.
- **Print Studio:** Web application for formatting and printing Markdown documents. Technologies: web development, Docker, CI/CD.
- **Hermes Agent** - Personal environment for working with AI agents, persistent memory and skills. Technologies: LLMs, MCP, APIs, webhooks.
- **Personal Portfolio y services Site.** Landing pages with a design system and SEO fundamentals. Technologies: Astro, React, TypeScript, Tailwind CSS, i18n.

EDUCATION

Telematics Engineering – Polytechnic University of Cartagena **Cartagena, Murcia Spain**
Information and Telecommunications Technologies *July 2021*

Additional Training
Docker Advanced · Linux Advanced · Oracle PL/SQL Advanced

LANGUAGES

Spanish: Native | English: B2.
